THRONE OF SHADOWS

A GAME BY ALDORLEA GAMES www.aldorlea.org

INSTRUCTIONS MANUAL

GENERAL GAMEPLAY FEATURES

MAIN MENU

There is a "secret" third line in the Main Menu (accessible by pressing ESC while outside of battles), that you can access by pressing down from the second line. It contains the tab "Instructions" and "End Game".

AUTOSAVE

The game autosaves after each battle and after each teleport (from one map to another). It is recommended to use other slots for regular (manual) saves, nonetheless.

In Normal and Casual modes, it is possible to save everywhere. However it's only possible to save in selected places (generally ones with no or little danger) in other (harder) modes.

• HP/MP HEALING ON LEVELLING UP

This is a very important, strategic even, aspect of the game. Upon levelling up, characters entirely recover their HP <u>AND</u> MP.

This is important strategy-wise because it allows you to save on healing items, if you pay attention when your characters are going to level up.

DASH

Press SHIFT while moving so you can walk faster (run, actually). There is no limit in how long and/or how many times you can use it.

• ESCAPE

In this game, you can <u>always</u> escape a fight with 100% success (assuming the escape button is available, of course).

To do so, press ESC in the main battle menu when you're prompted to assign a move to a character. You'll get another menu: FIGHT-STATUS-OPTIONS-ESCAPE, pick ESCAPE.

• DIALOGUES

It is possible to speed up dialogues (and cut scenes) by keeping the ENTER (or SPACE) button pressed.

EXPLOITS

Exploits are a very important aspect of the battles in this game – possibly the most important one.

When you hit a critical, or when you pick an attack targeting an enemy's elemental weakness (fire, ice etc), resulting in 20% or more extra damage, you get the opportunity to play again! Attention, enemies can do the same to your party!

Each enemy (and character) can only be exploited once per turn. If you want to keep "exploiting", you need to pick a new target.

An exploited enemy (or battler) will be "shocked" for one action, meaning they'll lose some power.

Shocked malus:

- HIT RATE -20%
- EVASION RATE -100%
- CRITICAL RATE -5%
- CRITICAL EVASION -10%
- ATK/MAT *80%

The exploiter will get a bonus. All characters have one, but only some specific enemies get the extra bonus. These bonuses will be detailed in this guide. However, character's exploiter bonuses are mentioned directly in the game, via the status menu.

<u>Note</u>: as Shocked is directly connected to exploits, it's not considered a status ailment, and therefore cannot be cured using the usual skills or items to cure regular status ailments.

STATUS AILMENTS AND DEBUFFS

It is possible to check the status ailments and debuffs of all your characters AND the enemy side at any time during a FIGHT.

To do so, press ESC in the main battle menu when you're prompted to assign a move to a character. You'll get another menu: FIGHT-STATUS-OPTIONS-ESCAPE, pick STATUS.

Here is a list of all status ailments in this game:

• POISON

HP REGENERATION -6% PERSISTS AFTER BATTLE

• BLEEDING

HP REGENERATION -8% ENDS AFTER 5 TURNS

BURNING

HP REGENERATION -10% ENDS AFTER 3-5 ACTIONS

• <u>SILENCE</u>

CAN'T USE SKILLS ENDS AFTER 3-5 ACTIONS

BLIND

HIT RATE -50% ENDS AFTER 3-5 ACTIONS

• RAGE

ALWAYS ATTACK ENDS AFTER 2-4 ACTIONS OR IF DAMAGED (50% CHANCES)

PARALYSIS

DON'T DO ANYTHING EVASION -100% ENDS AFTER 3 TURNS

• <u>STUN</u>

DON'T DO ANYTHING EVASION -100% ENDS AFTER 1 ACTION

• FREEZE

DON'T DO ANYTHING EVASION -100% DEF -20% ENDS AFTER 2-3 TURNS OR IF DAMAGED (20% CHANCES)

• <u>SLEEP</u>

DON'T DO ANYTHING EVASION -100% ENDS AFTER 3-5 ACTIONS OR IF DAMAGED (100% CHANCES)

CONFUSION

ALWAYS ATTACK BUT ENEMIES AND ALLIES INDIFFERENTLY ENDS AFTER 2-4 ACTIONS OR IF DAMAGED (50% CHANCES)

• CHARM

DON'T DO ANYTHING

ENDS AFTER 2-4 ACTIONS OR IF DAMAGED (50% CHANCES)

- <u>CHAINED</u> (RARE) DON'T DO ANYTHING HP REGENERATION -2% ENDS AFTER 4 TURNS
- <u>HP/MP/TP REGENERATION</u>
 REGENERATES 10% EACH TURN
 ENDS AFTER 7 TURNS
- <u>CROWN OF THORNS</u> (RARE) ALWAYS ATTACK HP REGENERATION -15% ENDS AFTER 7 TURNS
- FIRE FORCE
 ATTACK ELEMENT FIRE
 HALVED DAMAGE FROM FIRE
 ATK +10%
 ATTACK STATE BURNING +20%
 ENDS AFTER 5 TURNS
- ICE FORCE
 ATTACK ELEMENT ICE
 HALVED DAMAGE FROM ICE
 DEF/MDF +10%
 ATTACK STATE FREEZE +20%
 ENDS AFTER 5 TURNS
- THUNDER FORCE
 ATTACK ELEMENT THUNDER
 HALVED DAMAGE FROM THUNDER
 MAT +20%
 ATTACK STATE PARALYSIS +20%
 ENDS AFTER 5 TURNS

All those status ailments (the negative ones) can be cured using a Panacea.

Debuffs are different from status ailments. They do only one specific thing: they decrease the value of a given stat (ATK/DEF/MAT/MDF/AGI).

- A single debuff (the icon is yellow) decreases a given stat by 25%.
- A double debuff (the icon becomes rather red with a larger arrow) decreases it by 50%.

Buffs work exactly the same way except they increase the stat. It is possible to double buff as well.

GENERAL TIPS

Although there is an autosave, don't forget to save manually and regularly, and on different slots. It's especially true in harder modes where saving isn't available everywhere.

Always try to protect your weakness so you don't get exploited by enemies. An easily exploitable character can quick become a liability and penalizes his entire party, by allowing the enemy to play again, and possibly launch a deadly, large-damaging attack. If a character has a weakness to an Element superior to 20% (it will show in the status menu as a minus something in grey), they should try to equip something that will increase their resistance to the element in question.

Buy Ethers. Always have 10+ as soon as possible. Ethers are very important because magic is very important. Although some use TP, and no item restores TP, a lot of them still use MP, which Ethers do restore.

Use enemies' exploits. Remember that once an enemy has been exploited by a given character, you need to target another enemy if you want a chance to keep exploiting with the same character. You can identify easily which elements (if any) an enemy will be weak to using the data from this guide.
